

Basic Detail Report

ANMS1546[045]

Title

Cape Barren Goose 37 sail plan

Date

December 1973

Primary Maker

Professor Peter Numa Joubert

Medium

Ink on tracing paper

Dimensions

Overall: 700 × 705 mm

Name

Plan

History

Professor Joubert was a highly respected engineer and lecturer and was a consultant for a number of private and government engineering projects. He had a sailing background and was a close friend of naval architect Alan Payne. Professor Joubert's involvement in yacht design fulfilled a desire to be involved in this aspect of engineering without making it a full time occupation. He produced a small number of production designs that reflected his objectives of creating a strong, seaworthy yacht for racing and cruising. He also worked on the design of fast catamarans for racing and setting speed records, this is a specialised and niche area of yacht design, but an area where Australia has demonstrated extraordinary success in the past through other designers and builders who were contemporaries of Professor Joubert.
