LOSS OF THE ROYAL GEORGE
at Spithead, August, 1782

Date: c 1850

Primary Maker: Admiral Sir
C P H Durham

Medium: Ink on paper,
bound in wood boards,
leather spine, gilt

Name: Book

History: HMS ROYAL
GEORGE sank during
maintenance off
Portsmouth in August 1762
with an estimate loss
around 900 lives, many of
whom were civilians and
not crew. Built in 1755 the
ROYAL GEORGE had served
in the Seven Years War
and the American
Revolutionary War. At the
time of its sinking, the ship
was anchored at Spithead
being refitted for a posting
in Gibraltar. Part of the
maintenance required the
ship to be heeled over but
accounts suggest that
shifted weight of the
cannons and the continual
loading of supplies caused
the ship to take on water
through its ports and by
the time it was realised
and attempts were made
to rectify the situation, it
was too late and the ship
sank quickly. Being so
close to shore the disaster
was witnessed by many on
land and had a devastating
effect on the Portsmouth
region. Aboard the vessel

and believed to have been
trapped in his cabin was
Rear-Admiral Kempenfelt
who drowned along with

melancholy snipwreck of
CHARLES EATON

Date: 1837

Primary Maker: Thomas
Wemyss

Medium: Ink on paper

Name: Book

History: CHARLES EATON,
a barque of 313 tons, left
Sydney for China via
Torres Strait and Java in
July 1834. It was carrying a
cargo of calico and lead
with 25 crew and six
passengers. The ship ran
into thick weather near the
Charles Hardy Islands off
Cape York and it was
unable to avoid hitting a
reef. CHARLES EATON was
destroyed, one crew
member drowned, and five
other crew members
managed to launch one of
the boats and left the
wreck. The remaining
survivors spent the next
week making a raft;
however, once it was
completed it was unable to
hold everyone. It was
tethered to what was left
of the stern of the
CHARLES EATON but the
following morning the raft
and occupants were not to
be seen. It included a
family, the D'oyly's, and
the master of the ship. The
remaining survivors, which
included a cabin boy
named John Ireland, spent
another week making
another raft. This raft
moved slowly but after
several days they arrived
at a group of islands. The
local inhabitants went out

Coleman left behind an

many women and children who were aboard the vessel visiting family members. The sinking of the ROYAL GEORGE with such a huge loss of life in calm waters and within sight of shore had a traumatic effect on Britain, particularly the Royal Navy. Some metal and timbers that could be salvaged from the wreck were made into various forms of national memorials and small souvenirs, such the covering of this book. It is believed that the publisher produced two thousand of these small, portable volumes while others turned metal into household items such as snuffboxes. On a larger scale, some of the ship's cannons were melted down to form the base of Nelson's column at Trafalgar Square.

Local inhabitants went out in canoes to the raft and the survivors chose to go with them back to the islands. Once they arrived on shore, exhausted and weak, they searched for food but were unable to find any. The locals were gathered near them and the survivors felt threatened. However, as they were utterly exhausted, they lay down to sleep on the beach, resigned to their fate, and very soon after this they were attacked with most of them being murdered by a blow to the head. Ireland almost had his throat cut but fought against his attacker and escaped into the sea. However, he had no strength and returned to the shore where he was shot with an arrow to the chest but survived. Another member of the crew, Sexton, also struggled and survived. They witnessed the decapitation of bodies and the heads of the victims placed around a fire. The next day Ireland and Sexton were taken to another island where they found the two young D'Oyly boys, George and William, and the ship's dog. William was approximately two or three years old. The boys told a similar story of the fate of the first raft. They stayed on the island with about 60 locals for two months when the

two months, when the group split with one taking Ireland and William D'Oyly. This group travelled from island to island until Ireland and D'Oyly were traded for a bunch of bananas each. The boys were then taken to Murray Island, in the Torres Strait, and given new names; Ireland called 'Wak' and D'Oyly 'Uass'. After about 13 months on an island in the Timor Sea, the five crew members from the boat of the CHARLES EATON reached Batavia and told authorities of the wreck and that passengers and crew had survived it. Also, in October 1835, the ship AUGUSTUS CAESAR had discovered some wreckage from the CHARLES EATON and informed the Admiralty upon arrival in England. The Governor of NSW, Sir Richard Bourke, was informed and he ordered HMCS ISABELLA to be fitted out to investigate the Torres Strait under the command of C M Lewis. ISABELLA left Sydney on 3 June 1836. ISABELLA reached the Torres Strait and proceeded to search for survivors on a number of islands. It arrived at Murray Island on 19 June and a group of local inhabitants came to the ship to initiate trade. Lewis noticed a European boy on the shore of the island and encouraged the inhabitants

encouraged the inhabitants to bring him to the ship. Ireland was taken to ISABELLA where he informed Lewis that William D'Oyly had also survived and was on the island. A series of negotiations took place between Lewis and the locals for them to hand over D'Oyly. They were reluctant and at one point Lewis made a demonstration of force but eventually D'Oyly was traded for axes and other implements. D'Oyly was upset at being separated from the women who had cared for him but was calmed with some clothing. Lewis remained at Murray Island until 26 June, trading with the inhabitants and trying to uncover any information about the fate of George D'Oyly and Sexton. Ireland had heard that they had also been murdered after the groups had split and the inhabitants repeated this information to Lewis. On 18 July 1836 ISABELLA anchored at Darnley Island, also in the Torres Strait, where Lewis was told that the inhabitants had seen the heads of D'Oyly and Sexton on a nearby island. This island was reached on 25 July and the crew went ashore to search for any remains. The island was deserted but Lewis found a shed with many heads, including

with many heads, including 17 European ones. There was evidence of the skulls being crushed by a blunt implement. The crew destroyed everything on the island and took the heads back to ISABELLA. The ISABELLA returned to Sydney on 12 October 1836 having been away for 19 weeks. On 17 November 1836 the skulls were buried at the old Sydney Burial Ground but were moved to Bunnerong Cemetery near Botany when Central Station was built. William D'Oyly returned to England with Lewis in 1838 (surviving another near shipwreck on the voyage) and was raised by relatives. The fate of John Ireland is unknown.

journal from Booby Island and Goode Island
Date: 1893 - 1929
Primary Maker: William Benjamin Norgate
Medium: Handwriting and printing inks on a range of papers, silver gelatin photo
Name: Journal
History: "Booby Island lighthouse was built in 1890 to light the western entrance to Torres Strait. Following a common Queensland design, the lighthouse tower is wood framed, with galvanised iron plating. Standing at 18 metres tall, the lighthouse was originally fitted with a Chance Brothers lantern and Second Order lens. Upgrades to the light have included the kerosene wick burner being switched to incandescent kerosene in 1917; the installation of a mercury float pedestal in 1928 and the conversion to diesel electric operation in 1958. In 1991 solar electric operation was introduced and the original Second Order lens was replaced by sealed beam array. Booby Island itself has a significant history, from ancient Torres Strait Islander creation legends, to Captain Cook's landing in 1770, and the landing of the mutinied Captain Bligh in 1789. Booby Island is sometimes also known as Post Office Island for the practice started in 1820 of passing ships leaving messages in a cove. This

messages in a cave. This practice continued until 1874 when Thursday Island became the major port in the Torres Strait. In 1995, the sealed beam array was removed from the lighthouse and a Vega VRB-25 beacon was installed. In the same year, Booby Island lighthouse, which had been the most northerly manned lighthouse in Australia, was de-manned. The original Booby Island lighthouse lens and mechanism can be seen at the Green Hill Fort Museum on Thursday Island." [www.asma.gov.au} This journal by William Norgate is extraordinarily detailed and meticulously kept. In addition to the day to day events of life which generally revolved around maintenance of the lighthouse and associated fixtures, life on the island is recorded through transcribed letters to and from Norgate. In one letter Norgate talks of the trials of sharing the island with the other keepers; "Our principal work is of course to watch the light and keep it burning bright. During the day it is cleaning everything, there is very little else to do. It is very lonely here for Lizzie, for though we live close to one another, she scarcely ever sees or speaks to anyone but myself. Of course there is no fear of quarrelling being like this but I think

being like this, but I think she carries it too far. The Boss' people seem very nice but, much like herself, like to keep at home. " (5th February 1892). Title: Touch-hole pricker
excavated from the wreck
site of the BATAVIA

Date: before 1629

Medium: Brass

Name: Touch hole pricker

History: Among the many
artefacts excavated from
the BATAVIA site was this
touch-hole pricker. Ezekiel
Barker explains the use of
a touch-hole pricker in his
1825 book as ;"Whenever
the barrel is cleared, it is
necessary that the touch-
hole should be well cleared
with a small feather, a
piece of rag, or tow,
pushed through it with a
small wire or touch-hole
pricker, until dry, which will
preserve it for many
years". (Barker, E., Twenty-
Six Years Practice and
Observations with Rifle
Guns, 1825, page 18.)

DUNCAN DUNBAR, Australian passenger ship, on the coast of Brazil
Date: 1865
Primary Maker: Illustrated London News
Medium: Paper, ink
Name: Engraving
History: DUNCAN DUNBAR was built at Sunderland, Scotland, by James Laing & Sons in 1857. It was a wooden (teak and oak), three-masted clipper of 1,374 tons, owned by the well known English ship-owner Duncan Dunbar, who owned 24 ships, five of which were engaged in the emigrant trade to Australia. Captained by James Banks Swanson, the DUNCAN DUNBAR was on a voyage between London and Sydney in 1865 when, driven by contrary winds, it struck the Rocas shoals in October 1865. The shoals are in the Atlantic Ocean some 150 miles northeast of Cape San Roque, Brazil. All 70 passengers and 47 crew were rescued by the Royal Mail Steam Packet Company steamer ONEIDA. The accompanying article is as follows: It has been mentioned that the ship Duncan Dunbar, of London, Captain Swanson, master, which left London on the 28th of August and

Plymouth on the 2nd of September, with passengers and cargo, for Sydney, was, on the 7th of

October, wrecked on the reef Las Roccas, lying in long. 33.45W and lat. 3.52 S on the coast of Brazil. She struck on the reef at about half-past eight in the evening. Every effort was made to get the ship off, but in vain, as she went on at high tide. Soon after the vessel struck the captain had gone in one of the boats to take soundings round her. As the boats could not carry all on the wreck, he determined to await daylight and then land, if there was any available spot; and, if there was no landing-place, to take all from the wreck in the boats and on a raft. "It is impossible," says one of the passengers, "to describe the state of mind in which we passed the hours of that most awful and trying night. The vessel was rolling from side to side, and striking most violently at each roll, in a way which seemed to threaten her instant destruction. As day dawned every glass was used in the hope of discovering some place uncovered by water, on which shelter, if only temporarily, might be taken. The captain again went in a boat, and succeeded in getting through the breakers to a landing-place on one of the two banks or islets of sand which rise about 7 ft above

of La Perouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

ordinary high-water mark. Preparations were at once made for landing. The passengers were lowered in a chair over the stern into the life-boats, it being impossible to get the boats alongside the rolling vessel. By seven we were all landed. On landing, we found that the little islet or bank of sand was covered with pig-weed, but there were no signs of water. During this day the captain directed the landing of water and provisions. Unfortunately, four out of five water-puncheons got at were lost, being stove in by debris of wreck, or having drifted away; and our anxiety was lest we should fail in procuring a supply of water for the party on the reef, consisting in all of 117 souls. For the first two days we had only half a pint of water apiece, although toiling in a severe and unaccustomed manner under a broiling sun, the thermometer being at 112. A tent was set up, and we sheltered ourselves as well we could. The place was much-infested by land-crabs and various kinds of vermin, as well as by sea-birds. We obtained provisions, however, from the wreck to such an extent that on our leaving the place, ten days afterwards, there remained water and stores sufficient

to serve a hundred people for a hundred days. The Captain left on the fourth day, in the life-boat, for Pernambuco. After proceeding 120 miles he was picked up by the Hayara, American ship, and dropped fifteen miles from Pernambuco. There he procured the assistance of the Royal mail-ship Oneida, which immediately came to the island and took all hands, 116 in number (the captain having remained in Pernambuco), safely to Southhampton. The ladies behaved with wonderful bravery from first to last." From the Sydney Morning Herald, 16 December 1865: 'The wreck of the Duncan Dunbar, which will be heard of with regret, has happily not been accompanied with any of that disastrous loss of life which made her semi-namesake so sadly famous. On the whole, accidents to outward bound ships to Australia have been few, and we trust they may remain so. The emigration to Australia has been far safer than that to America.' From the Maitland Mercury & Hunter River General Advertiser, 19 December 1865: WRECK OF THE DUNCAN DUNBAR - We regret to learn by the latest English telegram received last evening that the fine ship

Duncan Dunbar, bound to this port from London, was wrecked on the rocks off Pernambuco about the 8th October. It is satisfactory to know that the passengers and crew were all, saved, and were being taken on by steamer to London. The following is a list of her cabin passengers : Mrs. Henry Mort, a Misses Mort, servant, and child; Mr. George Thornton and Son, Mrs. Thornton, Miss Thornton; Mr. and Mrs. Robinson, Mrs. and Miss Hudson, Mr. and Mrs Jones, child, and servant; Mr. and Mrs. Davis, child, and servant; Mrs. Davis; Mr. and Mrs. Christian, Mr. and Mrs. W. Christian, Mr. and Mrs. Holt, Mrs. Debenham, Miss Young, Mrs. Charles Haigh, Mr. Galloway, Mr. Parbury, Mr. Downy, and Mr. Crase.- Dec. 14 From The Brisbane Courier, 17 January 1866: 'The ship Duncan Dunbar has been wrecked on her passage from London to Sydney. No lives were lost. The Sydney Insurance Companies will lose £40,000 by the wreck.' From The Sydney Morning Herald, 17 February 1866: WRECK OF THE DUNCAN DUNBAR. (From the Times, December 22) The following correspondence has passed in reference to the loss of the above vessel - "Board of Trade, Whitehall, December 21 "

Sir,- With reference to your report on the wreck of the Duncan Dunbar, I am directed by the Board of Trade to inform you that they were so dissatisfied with some of the evidence that they thought it desirable to take the opinion of the Hydrographer to the Admiralty. " I now enclose his report for your information, and I am to add that the professional officers of the Board of Trade entirely agree with the Hydrographer. "His report states the facts of the case so fully, and points out the errors in the evidence of Captain Jasper Selwyn and Captain Trivett so distinctly, that it is unnecessary to enter at large upon these subjects in this letter. " The Board of Trade have only to observe that the witnesses in question (upon whose testimony the conclusions of the Court seem to have been based) not only assume hypothetical currents (of the actual existence of which there is no evidence whatever), in order to account for a wreck which the course steered is quite sufficient to account for, but they pronounce and give credit to the opinion that a master of a first-class ship in the merchant service, when within two or three hours sail of a dangerous reef, and

steering directly for it, is justified in neglecting the obvious precaution of taking an afternoon observation. " The Board do not believe that such an opinion obtains among the intelligent officers of the mercantile marine; but if such an opinion were by means of the evidence in question to receive a credit which it does not now possess, the result of the inquiry would be to do serious harm and to increase the dangers of shipwreck. " In order to prevent the evidence in question from having this effect the Board of Trade think it their duty to publish this letter and the enclosed report from the Hydrographer. " I am, Sir, your obedient servant, T. H. Farrer, " To James Traill, Esq., Police Court, Greenwich." " December 16. " ' In regard to the loss of the Duncan Dunbar on the Rocas Shoal, I have to remark that supposing the ship to have been in the position as stated in the evidence at noon - viz , latitude 2.56 S., longitude 33 11 W., and to have subsequently steered at stated, from S.W. half S. to S.W. by S., and gone at a speed of between seven and eight knots - moreover, to have experienced the usual westerly current, as shown on the Admiralty chart -

then she should as nearly as possible have been on shore on Los Rocos, at the moment she was, and her grounding proved that her chronometers were in no appreciable degree in error, and that the current as shown on the chart, and stated in the Admiralty sailing directions, really did exist. " It seems very improbable that the witnesses examined did not give the extreme westerly course made by the ship and the more so as it appears the log-book was altered some days after the wreck to give the ship a more westerly course than had been assigned to her at the time. "As regards the evidence given by Captain Selwyn R N, and Captain Trivett, of the mercantile marine, to which the Board of Trade desire to draw special attention I have to observe that in regard to the southerly and easterly current described by the former officer as existing from sixteen to twenty miles N. E. of Los Rocos, there is no evidence whatever of such a current in the records of this department; but, on the contrary, all the documents bearing on the subject go to prove the existence of a westerly current. In the plans of Los Rocos made by Captain Parish, R N , in 1856, and by Captain

Selwyn, in 1857, no current is mentioned, and in the remarks of the latter officer which accompanied his plan, he notices the fact of the shoals lying in the heart of a westerly current, but communicates no information in regard to the southerly and easterly current stated in his evidence to have been established by him. " In regard to the remarkable difference in the latitude and longitude observed by Captain Selwyn, I have only to say that Lieutenant Lee, of the United States' navy, fixed the position of the shoal in 1852, that Captain Parish, R N., made a survey of it in 1856, and planted 100 cocoanut trees, and that Captain Selwyn again made a plan of it in the following year, and planted seven trees, three of which appear to have survived; that the observations of these three officers in regard to latitude agree within five seconds, and that the difference in their longitude amounts to two or three miles, which is no more than was to have been looked for in results obtained by ordinary ships of war not specially supplied with instruments for the purpose. " 'With reference to the statements of Captain Selwyn and Captain Trivett, that they would

have pursued the course adopted by the master of the Duncan Dunbar under similar circumstances, I am obliged to say that I entirely differ from them as to the prudence and safety of such a course, and it is, I think, a dangerous doctrine to disseminate that a shipmaster in charge of life and property is justified in abstaining from making all possible observations to ascertain his position when in the neighbourhood of danger. " ' A single observation for longitude at 4 p m of the 7th October ought to have prevented the catastrophe which occurred only four hours later. " ' In regard of the recommendations of Captain Selwyn, referred to in the letter from the Board of Trade, which I presume alludes to the desirability of the establishment of a lighthouse on the Rocos, I am of opinion that, however valuable such a light might be to the local trades, and admitting in an abstract point of view the utility of a light on any small low island in the middle of the ocean, it is not necessary for ocean ships, which would assuredly never adopt so westerly a route as the Rocos, unless compelled to do so, which would very rarely be the case. " ' It is submitted that these observations should be

referred for the information of the Board of Trade. " ' Geo Henry Richards, Hydrographer.' " From The Sydney Morning Herald, 19 January 1866: WRECK OF THE DUNCAN DUNBAR, (From our Melbourne Telegraphic Correspondent) 'The Duncan Dunbar sailed from Gravesend for Sydney on the 27th August, and was lost off Las Rocas, north of Pernambuco on the 7th of October. Her passengers and crew were all saved and conveyed by the Brazil mail steamer Oneida to Southampton, which place they reached on the 4th of November. The following is a list of her passengers: Mr. and Mrs. Robinson, Mr. and Mrs. Jones, child, and servant, Mrs. Mort and family, Mrs. and Miss Hudson, Mr. and Mrs. Davis, infant, and female servant, Mrs. Davis, Mr. and Mrs. Thornton, son, and daughter, Miss Young, Mr. and Mrs. William Christian, Mr. and Mrs. E. Christian, Mr. Wilkinson, Mrs. and Miss Beet, Mrs. Dudgeon, Mrs. Haigh, Messrs. Parbury, Galloway, Tomkins, Crase, Dowling, Hudson, Santylands, Geddes, thirteen second class passengers, and the officers and crew, fifty-nine in number.'

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and

out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

Coleman to John Hurst
Date: 2001
Primary Maker: Ron Coleman
Medium: Ink on paper
Name: Letter
History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to examine the sites of La Pérouse and carried out extensive survey and

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried

CATO OF HMS PORPOISE

Date: 1802

Medium: Iron

Name: Cannon ball

History: Matthew Flinders
was born in 1774 at
Donington, Lincolnshire
and joined the Royal Navy
in 1789. He sailed as a
midshipman with Captain
William Bligh on the
second breadfruit
expedition to the Pacific in
1791-93 and took part in
the British naval action the
'Glorious First of June' in
1794. In 1795, he sailed as
master's mate in the
RELIANCE to the colony of
New South Wales and
commenced a series of
investigative surveys. With
George Bass, in 1796 he
explored the reaches of
Botany Bay in the first TOM
THUMB, an 8-ft open boat,
then in 1798 he explored
Van Diemen's Land
(Tasmania) in the FRANCIS.
In command of the
NORFOLK he proved
conclusively that there was
a strait between the
mainland and Van
Diemen's Land. In 1799 he
charted areas around
present-day Moreton and
Hervey Bays in Queensland
and returned to England in
1800. With the backing of
Sir Joseph Banks, Flinders
was appointed in 1801 to
take command of an
expedition for the purpose
of making a 'complete
examination and survey' of
the southern coast, the
north west coast, the Gulf

of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

north-west coast, the Gulf of Carpentaria and parts westward, Torres Strait and if time permitted 'the whole of the remainder of the north, the west and the north-west'. Many still believed Australia to be two individual land masses separated by an inland sea. Flinders's exploration of the Australian coastline in INVESTIGATOR and the subsequent publication of his 'A Voyage to Terra Australis', a two volume narrative with accompanying atlas, greatly enhanced Australian geography. Flinders was returning to England as a passenger on HMS PORPOISE which was accompanied by CATO and BRIDGEWATER when in August 1803, the ships were wrecked on uncharted reefs (now called Wreck Reefs) off the Queensland coast. With 13 men he sailed back to Sydney in the ship's cutter to get help - a remarkable 1,127 km (700 mile) journey. He then returned to Wreck Reefs to rescue the survivors and continued to England, but was forced to stop in December 1803 at Ile de France (Mauritius) for supplies and repairs. As England was once more at war with France, Flinders was detained as a suspected spy for seven years. During this time he completed work on his

excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. completed work on his charts and narrative and wrote a paper on a method of compensating for compass deviations caused by iron in a ship. Flinders was eventually released in 1810 and returned to England to complete his experiments on compass deviations, his great work 'A Voyage to Terra Australis' and his survey charts. The book was published on the day he died, 19 July 1814, aged 40.

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the
Great Barrier Reef and in
the Coral Sea. Ron

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the
Great Barrier Reef and in

Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

the Coral Sea. 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites

of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the

Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites

of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

History: On Thursday 3 July

2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites

of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two

Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron

out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the

excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the
Great Barrier Reef and in
the Coral Sea. Ron

interest in early colonial

maritime history, maritime

archaeology, Pacific

exploration and ship

technology. He was

especially noted for his

work on Jean François de

Galaup, comte de La

Pérouse, HMAV BOUNTY,

HMS PANDORA and the

British Royal Navy. He

oversaw several seasons'

excavation work on the

wreck site of HMS Pandora,

led the first of two

Australian expeditions to

Vanikoro to exam the sites

of La Pérouse and carried

out extensive survey and

excavation work on the

the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the

Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the
Great Barrier Reef and in

Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron

the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two

Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and

out extensive survey and excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

excavation work on the Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

HURST TO RON COLEMAN
Date: 2001
Medium: Ink on paper
Name: Letter
History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

History: On Thursday 3 July 2008 Ron Coleman the former Curator of Maritime History and Archaeology at the Queensland Museum in Brisbane and the former State Maritime Archaeologist for Queensland died. Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two

Besides being the first State appointed maritime archaeologist he was also instrumental in the establishment of the Maritime Archaeological Association of Queensland in July 1982. Ron Coleman was a very well known, well published and highly respected archaeologist who worked on and had a serious professional interest in early colonial maritime history, maritime archaeology, Pacific exploration and ship technology. He was especially noted for his work on Jean François de Galaup, comte de La Pérouse, HMAV BOUNTY, HMS PANDORA and the British Royal Navy. He oversaw several seasons' excavation work on the wreck site of HMS Pandora, led the first of two Australian expeditions to Vanikoro to exam the sites of La Pérouse and carried out extensive survey and excavation work on the Great Barrier Reef and in

Great Barrier Reef and in the Coral Sea. Ron Coleman left behind an archive of more than 150 books, photographs, field notes and 150 manila document folders which provide a snapshot of one of the pioneers of maritime archaeology in Australia. Subjects covered in the archive include HMS PANDORA, the BOUNTY, BOUNTY Mutineers, Pitcairn Island, site excavation reports, Canadian built vessels lost in Australian waters, the wrecks of the SAPHIRE, WOODLARK, YONGALA, CORINGA PACKET, HMS SIRIUS, HMS FOWEY, the SWIFT, CERBERUS, the HOLLANDIA, Europeans in the Pacific, Manila Galleons, Dutch and Spanish ships in Australian waters, whalers in American waters, indigenous watercraft, anchors, chains, winches, cables, dripstones, arms and armour, ship's pumps, ballast, blocks and rigging, stores, olive jars and his survey work on Wreck and Saumerez Reefs.

work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
led the first of two
Australian expeditions to
Vanikoro to exam the sites
of La Pérouse and carried
out extensive survey and
excavation work on the
Great Barrier Reef and in
the Coral Sea. Ron

History: On Thursday 3 July
2008 Ron Coleman the
former Curator of Maritime
History and Archaeology at
the Queensland Museum in
Brisbane and the former
State Maritime
Archaeologist for
Queensland died. Besides
being the first State
appointed maritime
archaeologist he was also
instrumental in the
establishment of the
Maritime Archaeological
Association of Queensland
in July 1982. Ron Coleman
was a very well known,
well published and highly
respected archaeologist
who worked on and had a
serious professional
interest in early colonial
maritime history, maritime
archaeology, Pacific
exploration and ship
technology. He was
especially noted for his
work on Jean François de
Galaup, comte de La
Pérouse, HMAV BOUNTY,
HMS PANDORA and the
British Royal Navy. He
oversaw several seasons'
excavation work on the
wreck site of HMS Pandora,
